REFLECTIVE TECHNOLOGY™

BEST IN CLASS

**V.I.P. LIMITED
LIFETIME
WARRANTY**

**NO FADE
NO DISTORTION
PROMISE***

The best protection for dark, luxurious colors

Our SolarDefense Reflective Technology™ provides next-generation protection from the sun for the most durability and long-lasting beauty. From the inside out, these boards are engineered with breakthrough technology to resist heat, fading and distortion.

Our tough UV-stable polymer stands up to damaging rays and cooling compounds scatter more light to reflect more heat away from the siding, and keep panels cooler even on the hottest days. SolarDefense is so effective at protecting our boldest, darkest colors from the sun that we back it with an unmatched **No Fade, No Distortion Promise.***

Top layer disperses heat and helps resist fading by allowing light energy to flow both ways.

Cooling compound scatters light, reflecting heat away, keeping panels cooler.

Base layer stands up to heat, preventing distortion.

* Warrantied against (i) fade in excess of a Delta E of 1 Hunter unit and (ii) heat distortion from normal climate conditions or normal reflective light sources. See product warranty for details and terms and conditions.
