Ply Gem Performance Collection siding, soffit and accessories protect your home from the elements and keep maintenance to a minimum. Backed by a limited lifetime warranty, our products offer peace of mind and lasting value.

With seven distinct designs ranging from traditional clapboard profiles to the authentic look of cedar shingles, you’ll discover beautiful choices in a full spectrum of colors. Whichever products you choose, you’ll enjoy the quality of a trusted brand supported and backed by an industry leader, Ply Gem.

**Finishing touches.**
Our complete line of accents includes:
- Standard and Custom Shutters
- Gable Vents
- Decorative Corner Posts
- Door Surround Systems
- Mantel Systems
- Mounting Blocks & Vents

---

**A HEALTHY RESPECT FOR THE PLANET — AND OUR CUSTOMERS.**

Our products have features that positively contribute to sustainable building practices, improved energy efficiency or lifecycle benefits of homes. All are important aspects of sustainable building.

We also work with industry organizations to raise sustainability standards. Look for these logos to help identify green building products for your home.

Ply Gem supports green building and it shows. We are active members of both the USGBC and NAHB — two key industry organizations that are working to define sustainable building practices.

**NO MATTER WHAT COLOR YOU CHOOSE, YOU CAN BE SURE IT’S GREEN.**

Ply Gem can help you meet sustainable building goals and earn points in green building certification programs. It’s the result of Ply Gem’s commitment to reducing our impact on the environment.

We continually look at ways to make our operations more efficient and our products more durable:

- We reclaim scrap created during manufacturing
- We recycle pallets and packaging
- Our aluminum products contain a minimum of 67% recycled content
- We use less energy to transport our products than other cladding options
- When installed properly and under normal use, our products never require painting or staining. This helps reduce VOCs in the atmosphere
Cedar Dimensions™ Shingle and Hand-Split Shake Siding premium cedar panels recreate the natural beauty of hand-tooled, rough-sawn cedar siding without the maintenance.

- .080" adds strength and durability
- Withstands severe winds — Double 7" up to 210 mph*, Triple 5" up to 230 mph* and Hand-Split shake up to 190 mph
- We have 5 new colors in Cedar Dimensions Double 7" shingle - Brownstone, Brunswick, Cinnabar Dublin and Iron.
- Advanced, patent pending multi-point locking system ensures secure installation with perfect panel-to-panel alignment
- Random shingle pattern and realistic woodgrain texture replicate authentic wood shingles
- Coordinating corner posts preserve a seamless appearance
- Limited Lifetime Warranty
- Virtually maintenance free

*Tested in accordance with ASTM D5206. Wind speed rating will vary depending on specific code region and construction method. Refer to local building codes for detailed requirements concerning allowable wind load and specified conversion tables for actual wind speed.

OUTSIDE CORNER POSTS

Our matching Outside Corner Posts ensure a cleaner, more authentic appearance than standard outside corner post options (inset).

CEDAR98CP
CEDAR78CP
CEDAR58CP8CP
Cedar Dimensions™ Half-Round Siding completes the look with beauty and classic architectural styling.

- .080” nominal thickness for strength and durability
- ½” profile height provides realistic shadow lines
- Withstands severe weather conditions with winds up to 180 mph*
- Authentic cedar texture looks like the real thing without the maintenance hassles
- Limited Lifetime Warranty

* Tested in accordance with ASTM D5206. Wind speed rating will vary depending on specific code region and construction method. Refer to local building codes for detailed requirements concerning allowable wind load and specified conversion tables for actual wind speed.
Trusted by consumers and contractors alike, Dimensions™ premium siding offers features that make it among the finest exterior cladding products.

- Premium .044” nominal thickness adds impact resistance
- Full ¾” profile height increases rigidity, so panels hang straighter
- Folded nail hem provides strength to resist even hurricane-force winds up to 220 mph*
- Oversized locking mechanism and full-length return for stronger, more secure installation
- Available in 28 colors and two profiles
- Limited Lifetime Warranty

### CEDAR COLORS

Cedar Colors employ a high-quality coating system using Clear Coat 500® — a multi-layer, weather-resistant, high-end coating with a proven history of unmatched protection against the damaging effects of constant UV ray exposure — along with multiple layers of cedar graining and shading for superior fade resistance, remarkable texturing and color retention.

- 25% less expensive than real cedar
- Won’t crack, split or peel like paint
- Available in Double 4” Traditional Lap and Double 4½” Dutch Lap profiles
- Four unique colors to choose from

#### Clear Coat 500® Finish
- Print Coat 1 (grains/ticking)
- Print Coat 2 (shading/undertones)
- Thermal Mechanical Weld Coat 1
- Thermal Mechanical Weld Coat 2
- Solid Vinyl Substrate

### NEW TO DIMENSIONS

*Tested in accordance with ASTM D5206. Wind speed rating will vary depending on specific code region and construction method. Refer to local building codes for detailed requirements concerning allowable wind load and specified conversion tables for actual wind speed.*

OUR COATING PROCESS

Unrivaled resistance to weathering and scratches. Two-coat process — includes corrosion-inhibiting primer and acrylic topcoat

1 - Environ high-performance acrylic topcoat
2 - Corrosion-inhibiting primer
3 - Multi-stage cleaning process
4 - High-tech aluminum

Corrosion Inhibitors

| TOP: Aluminum panel performs in adverse conditions |
| BOTTOM: Single-coat polyester corrodes severely |

Fade Resistance

| TOP: Aluminum resists harmful sun rays |
| BOTTOM: Competitive polyester fades rapidly |
ALUMINUM FASCIA

The beginning of every siding project, fascia keeps harsh elements from penetrating your home's interior, and causing water and wind damage that can often go undetected for a long time.

- Ribbed Finish results in an installation that is straight and ripple free
- Woodgrain Embossed Finish mimics the look of natural oak woodgrain
- Nominal .024” and .019” thicknesses
- Available in 12 profiles for design flexibility
- Available in colors that match or coordinate with your home exterior color combinations
ALUMINUM TRIM COIL

Our beautiful, maintenance-free Aluminum Trim Coil is designed to stand up to nature's harshest elements. Two durable finishes specially formulated to preserve the appearance and a variety of popular colors ensure lasting beauty.

Additional benefits include:

- Lays flat, cuts clean, and is easy to install
- Excellent for brake form and flashing applications
- Nominal .019” or .018” thicknesses
- Thermoplastic PVC coating gives you a natural woodgrain look
- Environ® finish with a baked-on acrylic coating creates a smooth, clean look with superior color retention
- Available in 100+ colors to coordinate with every home exterior color combination
- All widths available in 50’ lengths

Environ is a registered trademark of PPG Industries, Inc.
Our vinyl trim and accessories replicate the look of traditional wood trim, but without the maintenance. Engineered to the same exacting standards as our vinyl siding, they’re designed to enhance your home’s exterior style for years to come.

**Lineals**
Lineals outline windows and doors. Also called trim or casing, wider lineals emphasize windows and add a decorative element. A receiving channel to accept siding makes installation easy. We also offer fluted lineals to complement colonial and other historical styles.

**Corner Posts**
Corner posts convey sophistication and quality. They help define the structure of your home especially when they are the same color as your main trim. We offer several options to give your home a neat, professional finish.

**3” Snap-In Crown Molding**
Crown molding ensures an elegant, integrated look where soffit and porch ceilings meet siding and fascia. Our snap-in molding makes installation quick and easy.
What Siding Profile and Color Are Right For My Home?

Choosing the best colors and siding style for your home is fun and easy.

We offer a variety of options to complement your home’s architectural design, set a tone, and accentuate or downplay particular features. We can even change the perception of your home’s size.

Traditional Lap
These profiles recreate the look of traditional clapboard siding. They’re the most popular profiles because they produce a classic look compatible with almost any architectural style.

Dutch Lap
Dutch lap has strong shadow lines and is a popular alternative to standard clapboard profiles. The distinctive beveled panel design dates back to homes built by Dutch settlers on the eastern seaboard.

Beaded
With a rounded bead at the bottom of each panel, this profile creates deep shadow lines. Each course (or row) recreates the look of a wide beaded clapboard. Originating in the Southern United States, this profile is an excellent choice for Georgian, Federal and other Colonial styles.

Board & Batten
Seen from seaside villages to mountain retreats, this rustic style works well as an accent and on the entire home. It’s used to accent gables, dormers or to break up large areas of horizontal siding. It’s also a popular choice for homes with steeply pitched roofs such as Shed, Folk Victorian and French Country styles.

Shingle, Shake and Half-Round Siding
These profiles are molded from cedar shingles and have a rough texture suited to cape cod or craftsman styles. They’re often used as an accent to highlight gables. The half-round is particularly suited to Victorian styles where a gingerbread house effect is desirable.

Things to know to make color work for you:

Bolder colors give your home a lively, more dramatic appearance.

Softer, subdued tones create a more restful setting.

To make a smaller home appear larger, use light, coordinating colors of similar intensities.

To make a larger home appear less massive, use dark, contrasting colors.

Contrasting colors (opposites on the color wheel) make a home with simple, straight lines more eye-catching.

Small homes look better with fewer colors.

Larger, more ornate homes can handle a main color plus several accents.

Consider your home’s orientation to the sun and shade. Colors look brighter under the glare of sun and darker in shade.

Color is personal so choose a palette that makes you happy and reflects your personality.

Our Vinyl Siding and Soffit Specifications and Conformance

Ply Gem® Vinyl Siding and Soffit products are designed for use in residential and light commercial applications.

Finish

Ply Gem® Vinyl Siding and Soffit are produced from PVC compound containing quality color pigments to provide color throughout the thickness of the panel. Close control of color and gloss is maintained to provide for an attractive, weatherable surface. Textured vinyl panels are uniformly embossed to provide an attractive wood grain pattern.

Manufacturing Physicals

Solid Vinyl Siding, Soffit and Accessories are extruded polyvinyl chloride (PVC) compound as defined in ASTM D3679. “Standard specification for PVC Siding.” The cell classification as defined by ASTM D1974 is IS44-B.

Ply Gem® PVC ebeam meets or exceeds the properties listed here:
- Tensil strength (psi): 7100-7600
- Tensil modulus (psi): 360,000-400,000
- Specific gravity: 1.39-1.49
- Hardness (Shore D): 76.3
- Heat deflection under load 264 psi: 170 (degrees) F
- Load impact strength (ft-lbs./in. of match): 3.3
- Chemical resistance: Excellent
- Coefficient of linear expansion: 2.9(73.7) X 10-5

Relevant Standards/Codes

Ply Gem® Vinyl Siding products meet or exceed the following standards and/or code approvals:

Industry Standards
- ASTM
- ASTM
- ASTM
- BCDA
- ICBO
- SBCCI
- Metro Dade
- Texas State Board of Insurance Ruling

Building Codes
- D284 (U.B.C. #32.2)
- D685
- D3679
- 94-25
- 1478
- 9623
- IC-EC
- 00-0610.3

Fire-Resistance Ratings

ASTM E84
- Flame Spread: Less than 20
- Smoke density: 400
- Avg. time of burning: less than 5 sec.
- Avg. length of burning: 20 mins.

ASTM D635
- Smoke density: 48

IMPORTANT FIRE SAFETY INFORMATION

Exterior vinyl building materials require little maintenance for many years. Nevertheless, common sense dictates that builders and suppliers of vinyl products handle and install vinyl materials in a manner that avoids damage to the product and/or structure. Owners and installers should take a few simple steps to protect vinyl building materials from fire.

To Home and Building Owners

Rigid vinyl siding is made from organic materials and will melt or burn when exposed to a significant source of flame or heat. Building owners, occupants, and outside maintenance personnel should always take normal precautions to keep sources of fire such as barbecues and combustible materials such as dry leaves, mulch, and trash away from vinyl siding.

Wall Fire-Resistance Matrix

For general information about vinyl siding products, contact the Vinyl Siding Institute, 12015th St., NW, Suite 220, Washington, DC 20005. Request brochures titled “Fire Properties” or “What Homeowners Want to Know.”

Ply Gem® Vinyl Siding and Soffit Warranty

Ply Gem® vinyl siding and soffit products are backed by a limited lifetime warranty. Consult the actual product warranty for complete coverage details.

Ply Gem® Aluminum Product Specifications and Conformance

Ply Gem® aluminum products are designed for use in residential and light commercial applications.

Finish

Soffit: The smooth finish is a baked-on, high-performance topcoat. Trim Sheet: Available in smooth finish and striated PVC.

Manufacturing Physicals

Aluminum Soffit Sheets - Alloy 3105-H26P
- Minimum Tensile Strength: 26,000 psi
- Minimum Yield Strength: 22,000 psi
- Minimum Flash-Ignition Temperature: 651˚F
- Minimum Self-Ignition Temperature: 673˚F
- Burn Rate: 1.15”/minute
- Note: Fire-treated versions may also be available for some popular wood-based siding products.

To the Building Trades, Specifiers, Professionals and Do-It-Yourselfers

When rigid vinyl siding is exposed to significant heat or flames the vinyl will soften, sag, melt, or burn, and may thereby expose material underneath. Care must be exercised when selecting underlayment materials because many underlayment materials are made from organic materials that are combustible. You should ascertain the fire properties of underlayment materials prior to installation. All building materials should be installed in accordance with local, state and federal building code and fire regulations.

PLY GEM® VINYL SIDING AND SOFFIT WARRANTY

Ply Gem® vinyl siding and soffit products are backed by a limited lifetime warranty. Consult the actual product warranty for complete coverage details.

Ply Gem® Cedar Dimensions Siding

Ply Gem® Cedar Dimensions siding is designed for use in residential and light commercial applications.

Finish

Cedar Dimensions siding is produced from a polypropylene compound containing quality color pigments to provide color throughout the thickness of the panel. Close control of color and gloss is maintained to provide for an attractive, weatherable surface.

Manufacturing Physicals

Shingle Siding
- 1 Style: Double 7” profile, 14” exposure
- 2 Butt dimension: 1½”
- 3 Length: 51½”
- 4 Thickness: nominal .100”
- 5 Material: polypropylene

Half Round Siding
- 1 Style: Double Round 6⅜” profile, 12½” exposure
- 2 Butt dimension: 1½”
- 3 Length: 35⅛”
- 4 Thickness: nominal .080”
- 5 Material: polypropylene

Relevant Standards/Codes

Cedar Dimensions siding is a rigid polypropylene siding. Cedar Dimensions siding, tested in compliance to ASTM flame test procedures, meets or exceeds the following properties as required by the national code bodies.

- Burn rate
- Minimum self-ignition temperature
- Minimum flash ignition temperature
- Flame spread and smoke developed

Deliver rigid polypropylene siding products to the project site in their original packaging. Store rigid polypropylene products in their original packaging on a flat surface under cover,stacked no more than 10 boxes high. Do not store in a location where temperatures may exceed 130°F.

IMPORTANT: FIRE SAFETY INFORMATION

Rigid polypropylene siding is made from organic materials and will melt or burn when exposed to a significant source of flame or heat. Property owners, occupants and maintenance personnel should be familiar with the performance characteristics of underlayment materials. For maximum safety, non-combustible underlayment materials are recommended. Normal precautions to protect rigid polypropylene building materials from sources of fire should be taken. Barbecues and combustible materials, such as dry leaves, mulch and trash, should be kept away from polypropylene siding.
