

POST WRAPS

Friction-fit design snaps together, requires minimal adhesive. Unlike other column wraps, a film keeps post wraps clean and allows the tape to be easily removed.

- Outperforms materials containing wood or ash (paint adhesion, rot, insect damage)
- Patented process for industry's best factory-sealed edges (dirt resistant)
- Cut ends do not require caulk, unlike wood or fiber cement
- Superior cutting, routing, and shaping properties vs. other trim products
- Packaged in removable film for factory to job-site defense against dings, scratches and dirt
- Available in smooth textures
- Large selection of accessories packaged in PlyPak[™] for easy handling and protection
- 30-Year Warranty
